### **American Nurses Foundation Welcomes Avantas to New Corporate Advisory Board**

**SILVER SPRING, MD** – The [American Nurses Foundation \(the Foundation\)](#), the charitable and philanthropic arm of the [American Nurses Association \(ANA\)](#), today announced [Avantas](#), a leading provider of strategic workforce management technology, services and strategies for the health care industry, as the newest member of the Foundation’s Corporate Advisory Board.

“We are excited and thrilled to have Avantas come on board as our latest Corporate Advisory Board member,” said Marla J. Weston, PhD, RN, FAAN, chief executive officer of both the Foundation and ANA. “Avantas’ focus on improving health care aligns with the Foundation’s mission to transform health care through the power of nursing.”

“It is an honor to be part of the Corporate Advisory Board,” said Avantas President Chris Fox. “Avantas came together with the mission of developing workforce strategies and tools to improve clinical, operational and financial performance. Our start was with a focus on nursing, and while we have broadened our methodology across the enterprise, including ancillary and outpatient areas, our commitment to empower nurses and nursing leaders with effective solutions is as strong as ever. We are excited by the opportunity to learn from and share our expertise with the American Nurses Foundation and the other distinguished organizations on the Board.”

The Corporate Advisory Board furthers the Foundation's mission to transform the health of the nation through the power of nursing. The partnership is designed to foster closer collaboration and dialogue with the leadership of [ANA](#), the [American Nurses Credentialing Center](#) and the Foundation on critical health care issues.

Board members will have a unique opportunity to discuss developments in nursing and share their perspectives on key issues. Additionally, the board will help identify trends, initiate policy discussion and lay the foundation for future collaboration that will benefit patients, nurses and the nation's health care system.
