

Optimized Resource Management Center

Drive Improvement of 4-6% Total Labor Spend

As Health Systems develop their plans to operate successfully in the new normal, one major pain point has been the need for a centralized Resource Management Center to view and deploy resources across inpatient units, ancillary units, clinics, including enterprise float pool deployment.

Whether you are at the start of your journey to build an RMC or have an existing RMC that needs to be optimized, Avantas, an AMN Company who has operated and helped health systems build Resource Management Centers for the past 20 years, is here to help you accelerate those efforts for a successful launch/re-launch.

ADVANTAGES

Advantages of an Optimized Resource Management Center Include:

SOLUTIONS

Resource Management Center Workshop

3 day workshop to provide the playbook and templates for you to successfully evaluate your operations and begin your journey of standing up an enterprise resource management center.

Resource Management Center Stand-Up

We provide elbow support and guidance to help you accelerate the build of your resource management center, process efficiencies and cost-savings goals.

Resource Management Center Outsourced

Outsource your central staffing function to us or have our team augment your services. To gain efficiencies, it is much greater than a call center - it includes proactive recruiting, schedule optimization, unit leader guidance, analytics and KPI reporting.
